

14.01.2025

TCR Denmark Bulletin

This bulletin is a supplement to all active Technical Forms

To increase safety, it is permitted to replace the seat with a different type/model/brand than the model(s) listed and pictured in the car's Technical Form.

However, the new seat must be of the same FIA Standard as listed in the Technical Form.

This bulletin does *not* apply to seat brackets. These must remain as the homologated seat brackets listed, and these must not be replaced with another type/model/brand unless there is an AD, ER, VF or VO from the manufacturer.

This bulletin is valid for the entire 2025 season, and for all participants.
